

The current state of the world

xts

tibble

Native time-index support

Specialized (& fast)
time-based
manipulation

Homogeneous data
(built on matrices)

Packages for financial
analysis (quantmod,
PerformanceAnalytics, ...)

Powerful generalized
data manipulation

Grouped analysis

Readability > Performance

Heterogeneous data +
list-column support

Wouldn't it be nice to have a **tibble**
with **time-index support**,
fully leveraging the tools of the tidyverse?
